APPLICATION FOR GREASE TRAP/INTERCEPTOR ADDITIVE USE

INSTRUCTIONS

This form shall be submitted for review when requesting approval to use products created for use in grease trap/grease interceptor (GT/GI) systems. All additives must be approved by the Santa Cruz Public Works Department before usage begins. **Using such products will not eliminate and may not reduce the need for routine cleaning and servicing of the system**. Please read the City of Santa Cruz additive policy for further information. If you have any questions, please call the Pretreatment Office at (831) 420-6050.

Please mail to: City of Santa Cruz Wastewater Treatment Facility
110 California Street
Santa Cruz, CA 95060
Attn: Environmental Compiance Manager

GENERAL INFORMATION

1. Business Name: _____

2. Street Address: _____

3. Mailing Address: _____

4.Owner/Manager: _____Phone #: _____ Fax: _____

5. Trap or Interceptor Size: _____ Cleaning Frequency: _____

6. Method of Cleaning/by: _____

PRODUCT INFORMATION

1. Product Name: _____

2. Vendor Name/Phone Number: _____

3. Method and frequency of application: _____

_____

4. Location product will be applied (Examples: sink drains, inside trap, floor drains, etc.): _____

_____

Note: Material Safety Data Sheets with all ingredients must accompany this completed form.

SANTA CRUZ PUBLIC WORKS DEPARTMENT POLICY
ON THE USE OF GREASE TRAP & GREASE INTERCEPTOR ADDITIVES
July 12, 1995

The following are the criteria for the review of GT/GI additives:

(1) Owners or managers of restaurants and other facilities that wish to use such products must obtain approval from the City Public Works Department (PWD). Each site wishing to use a product must obtain separate approval.

(2) A material Safety Data Sheet (MSDS) must be submitted to the City for approval of the product prior to beginning treatment. The MSDS, or other information submitted, must identify all active and inactive ingredients of the product.

(3) Products used must be composed of active bacteria and be designed to decompose the grease in the GT/GI. Products relying on enzymes, solvents, surfactants, or other chemicals are not permitted.

(4) No changes may be made to the GT/GI system unless approved by the City.

(5) The GT/GI may not be aerated, agitated or otherwise mixed or stirred at any time.

(6) The City may prohibit the use of a product either in general or in a specific location if pass-through of grease or other problems in the collection system or treatment plant occurs.

(7) Servicing frequencies shall not be altered, without approval from the City. The use of such products will not eliminate and may not reduce the need for routine cleaning and servicing of the GT/GI.

(8) Approved products shall not be changed without approval from the City.

Certification Statement:
I certify that the information contained in this application is true and correct to the best of my knowledge. I have read the "Santa Cruz Public Works Department Policy on the Use of Grease Trap/Grease Interceptor Additives" dated July 12, 1995. I understand that it is my responsibility to ensure that use of an additive is in compliance with this policy.
