

Landscape Transformation Photos from a Baker St Water Customer

Water intensive, original front yard, 5 years ago.

Removed tree and replaced it with a weeping cherry. Placed weed barrier on grass edge and covered with California Gold crushed granite.

Newspaper down, covered with good composted dirt.

Second area, covered with newspaper, ready for mounded dirt. It will form a swale in front yard to catch rain water.

Fresh dirt for the mounded front yard. I do all my own work - at 80 years old.

Welcome

Freeway daisies thriving in December, 2011.

Spring 2011

Summer 2012

Passerby's all stop and enjoy since no fence is needed.
