

POLICY TITLE WATER SERVICE — FUTURE PLANNING

POLICY STATEMENT:

The policy that water service from the Minicipal Water System is intended primarily for users of water within the City limits is valid as it relates to the determination of costs, allocations, and the service rate structure. However, planning for future water service and the extension of facilities should proceed in a manner which will coincide with planning for the establishment of the City's sphere of influence and the County urban service line as it relates to the adopted water service area.
